

Coupon stamp websites

1. Introduction

- There are many coupon stamps which says visit 10 times than one is free
- As those are paper based, it is easy to miss. So make a system based on web

2. Expected List of Features

- Visualize current number of stamps
- Connect to database.

3. Market Survey

- They offer QR scanning, integrating several vendors, connected to their services.
- They require installation of their application so that I'm going to do solely based on web-app
